WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

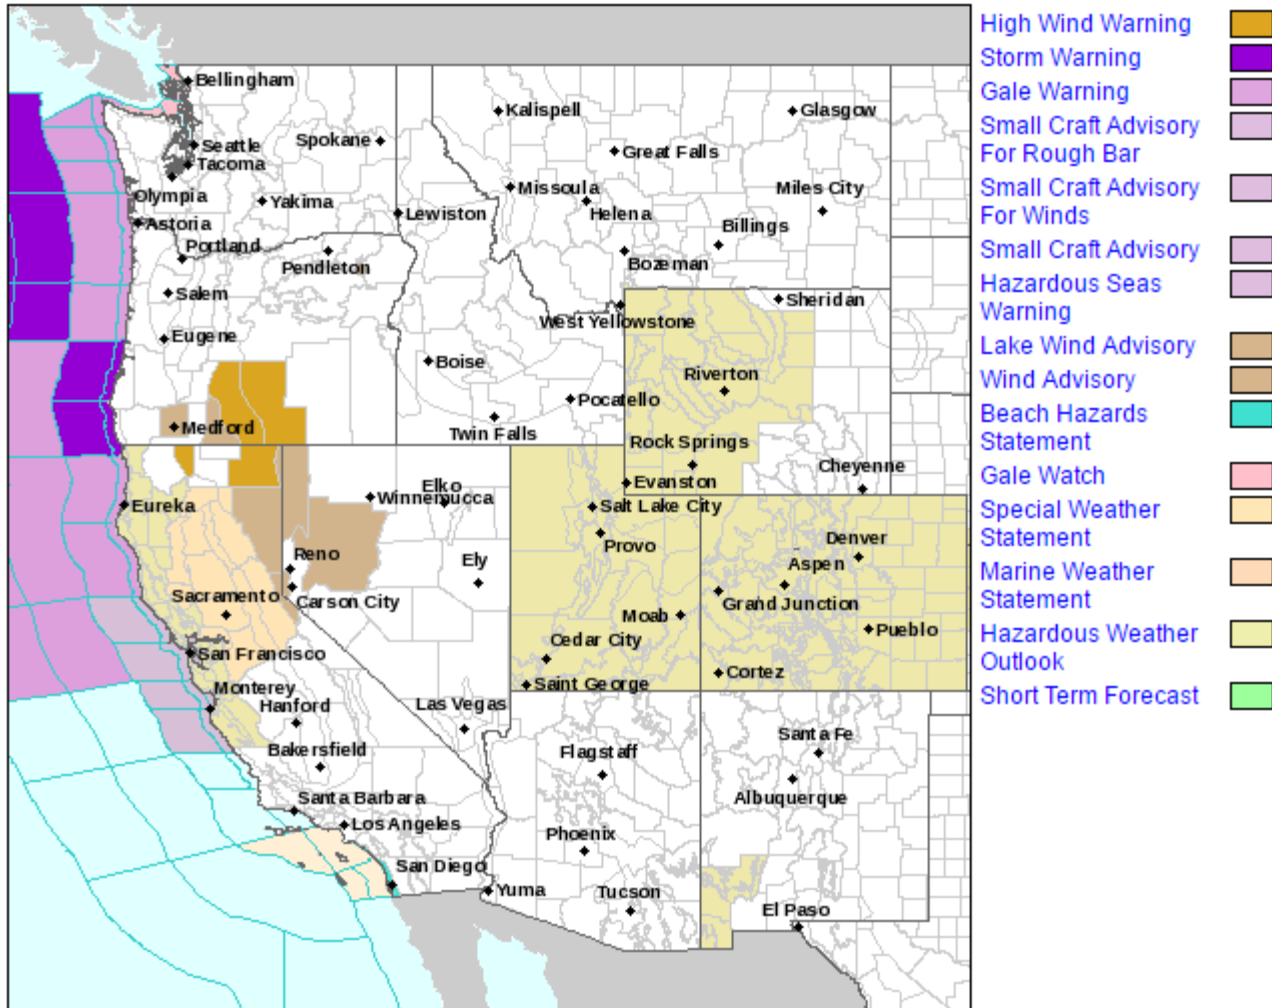

Windy, Unsettled, Wet Weather Returning Late Today Into Early Tuesday

Winds will be stronger today. Light to moderate rain will spread inland through early Tuesday. Most areas will see wetting rain from this system, with the exception of far eastern and southern areas where little to no rain may fall. Snow levels will be 6000 feet or higher. The front and rain will pull back to the coastal areas late Tuesday through Thursday, while other areas remain partly cloudy and breezy. Late on Thursday a Pacific low pressure system will approach central CA. Scattered showers will spread into Northern California Thursday night and Friday. Another strong front will reach the north coast with rain and gusty south winds late next weekend.

SOUTHERN CALIFORNIA

Subtropical moisture ahead of a Pacific trough will bring scattered showers to much of Southern California through Monday evening and to the Sierra today. Showers will end across the region tonight after the trough moves off to the east. Most locations will receive less than a quarter inch of rainfall through today. Southerly winds of 15 to 25 mph with gusts to 40 mph will continue to surface across the mountain ridges and desert passes through this evening. Temperatures will cool, with near normal temperatures today. Temperatures will warm a few degrees and humidity will decrease a little both Tuesday and Wednesday as a weak ridge of high pressure builds northward from Mexico. Winds will be light Tuesday and Wednesday. A couple of Pacific troughs will bring periods of showers to the entire region Thursday afternoon through next weekend. These troughs will also bring gusty southerly winds to the mountains and deserts. Temperatures will cool Thursday and then temperatures will be near normal Friday through next weekend.
